DETAILED DESCRIPTION OF THE INVENTION

Page 6, the first full paragraph is amended as follows:

Preferably, the present invention is applied to a spray device having a spray nozzle insert 32 for limiting the dead volume, and a spray profile 33 for guaranteeing proper spraying of the fluid each time the dispenser is actuated. The present invention thus makes it possible to guarantee absolutely leaktight closure, independently of the user, and without modifying in any way the spray profile or therefore the proper shape of the spray delivered when the dispenser is actuated.
